ABSTRACT

Animals need the same things people do: air, food, water, and shelter. Each animal has different ways of fulfilling those needs. In this videotape, students explore some of the ways various animals stay healthy and full of energy. This videotape correlates to the following National Science Education Standards for Life Science: characteristics of organisms; life cycles of organisms; and organisms and environments. This videotape is accompanied by a teacher's guide and a hands-on student experiment. (CCM)
